

AMENDMENTS TO THE CLAIMS

The following listing of claims replaces all prior versions, and listings, of claims in the application:

Claims 1-23 (Cancelled)

24. (New) A method of previewing a document, comprising:

- selecting a print driver on a client;

- generating a print file based on the document using the selected print driver;

- transmitting the print file to a server over a network; and

- displaying the document in an interface at the client based on the transmitted print file.

25. (New) The method of claim 24, wherein the selecting step includes:

- displaying a list of print drivers on the client; and

- choosing a desired print driver.

26. (New) The method of claim 24, further comprising obtaining the print driver.

27. (New) The method of claim 26, wherein the obtaining step includes transmitting the print driver to the client over the network.

28. (New) The method of claim 24, further comprising creating the document using an application installed on the client.

29. (New) The method of claim 24, further comprising compressing the print file before the transmitting step.

30. (New) The method of claim 24, further comprising verifying the print driver before the transmitting step.

31. (New) The method of claim 24, further comprising selecting file information associated with the print file using the interface.

32. (New) A system for previewing a document, comprising:

- a print driver user interface system for selecting a print driver on a client;

- a generation system for generating a print file based on the document using the print driver; and

- an upload manager for transmitting the print file to a server over a network and displaying the document in an interface at the client based on the transmitted print file.

33. (New) The system of claim 32, further comprising a version manager for verifying the print driver before transmitting the print file.

34. (New) The system of claim 32, further comprising an application for creating the document, wherein the application is installed on the client.

35. (New) The system of claim 32, wherein the network comprises one of the group consisting of a wide area network, and the Internet.

36. (New) A computer program product comprising a computer useable medium having computer readable program code embodied therein for previewing a document, the program product comprising:

program code for selecting a print driver on a client;

program code for generating a print file based on the document using the print driver;

program code for transmitting the print file to a server over a network; and

program code for displaying the document in an interface at the client based on the transmitted print file.

37. (New) The computer program product of claim 36, further comprising program code for verifying the print driver before transmitting the print file.

38. (New) The computer program product of claim 36, further comprising program code for creating the document.

39. (New) The computer program product of claim 36, further comprising program code for selecting file information associated with the print file.

40. (New) The computer program product of claim 36, further comprising program code for compressing the print file.

41. (New) The computer program product of claim 36, further comprising program code for transmitting the print driver to the client over the network.

42. (New) The computer program product of claim 36, wherein the program code for selecting includes:

program code for displaying a list of print drivers on the client; and
program code for choosing a desired print driver.

43. (New) The computer program product of claim 36, wherein the print file comprises a postscript file.
